Note: There may be other products that are affected. If your box or IDTV has stopped working and is not listed contact your retailer or the manufacturer for confirmation that it is a 2K COFDM only model.

2K only IDTVs can be upgraded with a modern digital set top box or digital recorder. Look for the 'digital tick' when buying any new TV equipment. Any 2K only sets being used to just monitor pictures/sound from games machines or DVD players will continue to work as before.
